WZRDnet Transportable Kits
Tactical, PRO and Starter

TELEGRID

- Rapidly Deployable Mesh Network

- Available as a Tactical, Pro and Starter Kit.

- Simply add handsets to increase network size.

- Operates without infrastructure (i.e., no cell towers or satellites required)

- Free local area voice and data communications

- Interoperable with VOIP networks and analog PSTN

- Interfaces include RJ-45, RJ-11, Serial, USB

- Share one satellite contract amongst many users

- Mesh network provides longer range than cell nodes or cordless phones

- GPS for friendly force tracking

APPLICATIONS

Military
- **Forward Operating Bases**
- **Field Hospitals**
- **Shipboard Communications**
- **Anti-piracy**

Public Safety
- **Disaster Relief**
- **Evacuation Centers**
- **Refugee Camps**

Commercial
- **Energy Exploration**
- **Mining Operation**
- **Site Security**
- **Remote Construction**

WZRDnet is a wireless ad-hoc mesh network that provides voice and data communications without existing infrastructure (i.e. no cell towers or satellites required). WZRDnet Kits contain, in a single man-transportable case, all the equipment needed to form a complete stand-alone voice, text and data mesh network as well as provide Wide Area Network access.

WZRDnet Transportable Kits provide modular and mobile communications around obstructions and beyond line-of-sight. Increase capabilities by integrating satellite terminals, ruggedized laptops, and solar power sources.

Tactical Kit
P/N: WTK-350-TAC

PRO Kit
P/N: WTK-350-PRO

Starter Kit
P/N: WTK-350-STR

Tactical versus PRO

- Tactical includes a rear signal entry panel so it can be run open or closed

- Tactical allows charging of all 10 handsets inside the Kit at the same time

- Tactical includes 2 Command Center Licenses to allow data transfer between two PCs

- Tactical includes 10 PTT Earpieces

PRO versus Starter

- PRO includes an additional 5 Handsets

- PRO includes an additional 5 Holsters

- PRO includes 1 Command Center License for mapping of GPS coordinates and chatting from a PC

- PRO can accept both AC and DC power
